Subject Index to Volume 28

Absorption rate calculation , 3
Absorption rate coefficient, 109
Anesthetized patients, 7
Autoinduction, 211

Bayes estimates, 344
Biliary excretion, 415
Bioavailability rate calculation, 3
Bisegmental input, 321
Bosentan, 507

Carbamazepine, 79
Cefpiramide, 415
Censored data, 481
Cerebral blood flow, 129
Cerebral pharmacokinetics, 129
Clearance, 79
Compartmental models, 93
Compliance, 344
Computer simulations, 193, 465
Convolution, 277
Cortiso, 157
Covariate, 231
Covariate screening, 253
Cyclophosphamide, 211
Cyclosporin, 445

Deconvolution, 277
Destructive sampling, 193, 465
Diazepam, 129
Dichotomous data, 391
Dispersion, 27
Dispersion model, 415
Dose-dependency, 415

Filgrastim, 321
Finite differencing, 27
First-pass accumulation, 3
First-pass metabolism, 3

G-CSF, 321
Guinea pigs, 533

Hazards, 277
Hepatobiliary transport, 415
Hepatocellular diffusion model, 415
Heterogeneous distribution, 445
Hill function, 57
Human, 109, 507

Identification, 93
Imirestat, 507
In vivo–in vitro correlation, 277
Indirect response models, 57
Information theory, 577
Interaction, 211
Interferon beta, 507
Ivabradine, 93

Laplacian estimation method, 391
Likelihood ratio test, 231, 253
Limit of quantification, 344
Linear systems, 93
Log transformation, 155
Lognormal distribution, 155
Lung pharmacokinetics, 129

Mathematical modeling, 507
Measurement error, 344
Midazolam, 129
Mivacurium, 7
Mixed effects, 391
Mixed effects model, 193, 465
Mizolastine, 297

1567-567X/01/1200-0607$19.50/0 © 2001 Plenum Publishing Corporation

Model evaluation, 171
Model fitting, 481
Model linearization, 365
MULTI(FEM), 415
Multivariate density distribution, 577

Naïve pooled data, 391
Neuromuscular blocking drugs, 7
Neutrophil, 321
Nonlinear pharmacokinetics, 507
NONMEM, 79, 231, 253, 321, 344
Normal distribution, 155

Odds, 277
Optimal design, 297
Oral absorption, 3
Oral bioavailability, 3
Oscillations, 27

P value, 171
Pediatrics, 297, 556
Peripheral elimination, 7
Peripheral link mode, 17
Pharmacodynamics, 57, 171, 129, 365
Pharmacokinetic–pharmacodynamic modeling, 7, 321, 533
Pharmacokinetics, 93, 171, 211, 297, 365, 445
Physiologically-based pharmacokinetic modeling, 27
Population analysis, 297
Population approach, 321
Population design, 365
Population information matrix, 365
Population modeling, 253
Population pharmacokinetics, 79, 231, 577
Population PK–PD, 344, 556
Posterior predictive check, 171
Prednisolone, 57
Propranolol, 109

QT prolongation, 533
Quantification limit, 481
Quinidine, 533

Randomization test, 231
Rat liver perfusion, 415
Receptor binding, 507
Receptor-mediated endocytosis, 507
Research study design, 193, 465
Restricted maximum likelihood estimation, 391
Reversed hazards, 277
Robust, 155

Schwarz's Bayesian criterion, 253
Sotalol, 556
Stochastic modeling, 445
Surface area, 79

Tacrolimus, 533
Target-mediated drug disposition, 507
ThioTEPA, 211
Time dependent oral absorption, 109
Tissue distribution, 27
Toxicokinetics, 193, 465
Wald's approximation, 253
Whole-body, 27
